Subject: Re: Pavillion VRP data

Hi Rob -

In an effort to answer your questions, Encana completed additional site characterization activities at TP42-11, TP 14-11, and TP 24-03 in accordance with the June 2011 Revised Site Characterization Work Plans and the February 2012 Interim Remedial Work Plan for TP 24-3.

Encana is submitting the additional site characterization data as part of the revised RAEs for each pit, not in a separate report. Kirsten Derr told me this is at the request of Kathy Brown, the previous WDEQ project manager for the site. I have received an electronic draft RAE for TP 42-11 on which I provided electronic, informal comments. The SC results for TP 42-11 were provided in this draft, revised RAE. I can send you the original draft RAE, but I believe Encana plans to submit a revised RAE soon if you'd rather just look at the updated version. I haven't received revised RAEs for the other two pits, and therefore, have not received the additional site characterization data for these pits. Additional site characterization data was also collected at Blankenship 4-8 in accordance with the approved October 2012 work plan, but I have not yet received a summary report.

A PRA for the VRP pits became effective on March 24, 2008, and a July 23, 2008 Public Participation Plan is also in place for the pits. In the November 7, 2011 reinstatement eligibility letter for Blankenship 4-8, the WDEQ determined that the existing PPP covered Blankenship 4-8. After the VRP approves the revised RAEs and selects remedies for the pits, the VRP and Encana will negotiate a Remedy Agreement.

Please feel free to contact me at [307-335-6970](tel:307-335-6970) or amanda.moyer@wyo.gov with any other questions or concerns.

- Amanda

Hi Rob: I'm fairly certain that there is additional information. Amanda Moyer has filled Kathy Brown's position and I've copied her on this email. I'll let you and her work out what you need.
Thanks,
Vickie

Hi Vickie,

I hope you're doing well.

I am wondering if you would be able to determine if any additional documentation exists regarding the four VRP pit sites that Encana has in the Pavillion field. I'm trying to add any documents that might have data collected for the VRP to my documents.

For the VRP sites numbered 2058 k, l, and r, (Tribal Pavillion 42-11, TP 14-11, and TP 24-03, respectively) the only documents with data that I have in my possession are the August 31, 2010 Remedial Alternative Evaluations and the June 2011 Revised Work Plans. Has any data been collected since the 8/31/10 RAEs were submitted? If yes, would you be able to send me those reports?

Additionally, the only data that I have for the site numbered 2058 y (Blankenship 4-8), is the data collected by Encana in September 2011 and reported in February 2012 as part of the pits workgroup activities. As you know, that site was reinstated into the VRP in November 2011. Has any additional data for this site been collected for the VRP? If yes, would you be able to send me those reports?

Has a remedy been selected for any of these sites in the VRP? I noticed on the latest site list online that these sites do not have a PRA or RA date.

Thanks Vickie,

Rob
